

Julien Bongars

Infrastructure, Cloud & Application Security Engineer

EXPERIENCE

Aptar Digital Health, Singapore

Senior DevSecOps Engineer (2024 - Current)

- + Drove application security across regulated products (ISO 27001, GDPR, medical devices), embedding controls and advising on remediation.
- + Found and helped remediate critical vulnerabilities: unauthenticated RCE (insecure deserialization), exposed S3 buckets, and more.
- + Re-architected a single-account startup setup into a multi-account AWS Organization with Identity Center, RAM sharing, and Okta IdP
- + Hardened access via IAM token audits and AD-authenticated VPN.
- + Secured infrastructure-as-code on Terraform/Scalr/Packer across Linux, ECS, and Airflow, plus PostgreSQL 12 to 17 migrations and cross-region DMS replication.

Tools – Burp Suite CE, AWS, Terraform, Scalr, Packer, Docker, Windows AD, OpenVPN, Java

Thales Group, Singapore

Senior Systems Engineer via Newtone Consulting (2024)

- + Secured air-gapped infrastructure for high-security government projects across HyperV, VMware, and RHEL.
- + Hardened Linux and Windows with SELinux and managed the full SSL/TLS certificate lifecycle in disconnected environments.
- + Built and secured RKE2 Kubernetes clusters with isolated DNS and networking.
- + Monitored security posture and reliability with Grafana, Prometheus, and OpenSearch.

Tools – SELinux, Windows, HyperV, RKE2 (Kubernetes), RHEL, VMware (ESXi/vSphere), Ansible, Bash, Python, PowerShell, Grafana, Prometheus, OpenSearch

AIRR LABS, Singapore

Senior Platform/Infrastructure Engineer (2023 - 2024)

TikTok & Shopify Integration Project: Developed a serverless application to manage a back-office fulfillment system which integrated with Shopify and TikTok Shop.

Brand.com – Shopify Storefront integration with an Order Management System using AWS Serverless architecture.

Tools – Golang, Bash, Python, Terraform, AWS, Docker, PostgreSQL (SQL), Vault, Linux

UNDERCURRENT CAPITAL, Singapore

Lead Web3 Developer (2022)

Messina Multi Chain Bridge (<https://messina.one/>) – A web3 application that allows users to bridge tokens from the Algorand blockchain to the Ethereum blockchain.

Tools – Ethereum, Algorand, Teal, Solana, Typescript, NextJS, Python, Bash, AWS (CDK)

SKILLS

Offensive Security, Cyber Security, Cloud Security, ISO 27001, AWS, IaC, Kubernetes, Active Directory, Linux Administration, Docker, Automation, Networking, Virtualization, Architecture, DB Administration, Software Development

EDUCATION

Ngee Ann Polytechnic

2015 – 2018

- Diploma in Engineering (Electronics)

Murdoch University

2018 – 2020

- Various modules in Computer Science/ Cyber Security

CERTIFICATES

OSCP (Offensive Security Certified Professional) – Offensive Security, in progress (2026)

AWS Certified Cloud Practitioner – Amazon Web Services, 2023

Certificate in Full-Stack Development – Institute of Systems Science, NUS, 2017

EXPERIENCE (CONT'D)

PRUDENTIAL ASSURANCE, Singapore

Cloud and Site Reliability Engineer via MP (2021 - 2022)

Self-service provisioning and Deployment Services – Managed a platform that enables our internal customers to automatically provision their own infrastructure via Git-Ops.

Custody Secret Engine for Hashicorp Vault – Developed a system where multiple users add their input to a JWE in sequence, securely storing the combined secret in Vault. Access requires a subset of users to collaboratively unlock it in a trustless environment

Tools – Azure, GCP, Terraform, Ansible, Linux, Jenkins, Kubernetes, Docker, Python, Django.

META INC, Singapore

DataOps Engineer via CE (2020 - 2021)

Automated Resolution for FTL Upstream Errors – Designed and implemented automated solutions for FTL upstream errors, including automatic restarting of failed jobs, backfilling data, and escalating to the relevant teams.

Meta DataOps Command Dashboard (WWW) – Developed a dashboard used for the reporting and troubleshooting data pipelines with failed upstream dependency.

Tools – PHP (Hack), MySQL, Spark, Java, ReactJs, GraphQL, Relay, python3, Neo4J, various other internal tools at Facebook.

BOOKMYSHOW, Singapore - Backend Developer (3 months in 2020)

Tools – Typescript, NestJs, MongoDB, Jest, Kubernetes, Docker, Skaffold, Google Cloud

AXA INSURANCE, Singapore - Senior Full Stack Developer via Maltem (2018 - 2020)

Wanderlust Travel Insurance, Singapore – Developed an online travel insurance portal and an internal components library for other e-commerce sites.

Scoot Travel Insurance widget, SE Asia – Built a travel insurance widget and an adapter for compatibility with various airline booking systems.

Tools – Node, Typescript, ReactJs, NextJs, MongoDB, RabbitMQ, OpenShift, Jest, Cypress, Pact, Salesforce

SINGAPORE DATA SCIENCE ACADEMY, Singapore - Part-time Lecturer (2018)

Tools – Python, Jupyter Notebook, Pandas, matplotlib, NumPy, scikit-learn

VOYAGER INNOVATION, Singapore - Platform Engineer PHP/Laravel (2017 - 2018)

Tools – Node, AngularJS, Sass, PHP Laravel, MySQL, AWS services, Grunt

HONAN INSURANCE, Singapore - Insurance Broker/ VB.NET Developer (2015 - 2017)

Tools – VBA, VB.NET, C#, advanced Excel, Outlook and Word Integration

SINGAPORE ARMED FORCES, Singapore - Field Instructor, Sergeant (2012 - 2014)

CERTIFICATES (CONT'D)

Property & Casualty Insurance — 2015

Mechanical/Electrical Engineering — MDIS, 2015

SOCIE TIES

MENSA Singapore - Member since 2014
